

Proudly COR Certified

Bringing Safety to New Heights

TSCBC: The COR Program

COR Primary Goal

The vision of the COR program is to eliminate workplace injuries and fatalities in BC's trucking, transportation, and related industries.

What is COR?

The Health and Safety Certificate of Recognition (COR) is awarded to employers who implement and maintain an occupational health and safety system that meets and exceeds all regulatory requirements of WorkSafeBC, including the Occupational Health & Safety Regulations and the Workers Compensation Act. In order to earn COR certification, employers must meet a strict set of audit standards and continuously strive to improve their safety program.

Phoenix and COR

Phoenix Truck & Crane has raised the bar in the fleet industry by attaining the Certificate of Recognition (COR™) in 2016. Our commitment to health & safety goes well beyond the average since we have taken the initiative to train our 130+ owner operators while keeping our excellent customer service and efficiency.

To take it even further, we are continuously encouraging the mobile crane and short-haul trucking industries to join us in our efforts and eliminate the potential hazards that our drivers and operators face every day.

By distinguishing ourselves with modern policies and professionalism, Phoenix Truck & Crane hopes to pave a path for the rest of our industry.
